

QUALITY WITH INTERNATIONAL AHRI BACKING

COILS:

Product Line Dedicated to the Commercial, Industrial, and Transportation Sectors

Tecam coils - copper-aluminum condensers and evaporators - are assembled to high-quality standards. The evaporator coils are certified under the AHRI 410 American standard, ensuring their quality, efficiency, and performance for the conditions required in various applications.

Range of Applications:

- Condensers
- Evaporators
- Cooling coils
- Heating coils

Main Characteristics:

- Assembled with imported 1/2" and 3/8" copper tubing with a wall thickness of 0.016" for direct expansion, chilled water, or condensers, and a thickness of 0.032" in coils for heating.
- Aluminum fins stamped with the exclusive 'Opti-Finn' system for optimal heat transfer and high energy efficiency.
- Modine Luvata anti-corrosion treatment, suitable for use in saline environments.

Tecam manufactures custom-made coils for special applications, suitable for replacement in existing equipment of any brand.

Optional: We offer anti-corrosion protection services by applying Modine/Luvata paint imported from the USA.

This paint protects against corrosive environmental elements while not affecting heat transfer.
